Question: 1

When stopping the cluster service on a dual node DR550 system, which of the following statements is true?

- A - Cluster services can be stopped from either node using the AIX command HACMP - stop.
- B - Cluster services can be stopped from either node using the AIX command smitty clstop.
- C - Cluster services must be stopped from both nodes individually using the AIX command HACMP - stop.
- D - Cluster services must be stopped from both nodes individually using the AIX command smitty clstart.

Answer: B

Question: 2

What is the process for setting up the client to enable data to be sent to the DR550?

- A - Create CIFS mapping on each client to map to DR550
- B - Create NFS connection to /archive directory on the DR550 then map this directory to clients
- C - Load System Storage Archive Manager API on each client and edit dsm.sys or dsm.opt and register clients
- D - Load System Storage Archive Manager driver on each client and edit dsm.sys or dsm.opt on server to register clients

Answer: C

Question: 3

System Storage Archive Manager script files are stored in which volume group?

- A - /lib
- B - /usr
- C - TSMApps
- D - TSMDBLogs

Answer: C

Question: 4

IBM System Storage Archive Manager has disabled which two functions of IBM Tivoli Storage Manager?

- A - Migration
- B - Off-site copy
- C - Import
- D - Backup database
- E - Lowering retention periods

Answer: B

Question: 5

How is "DS4000 Service Alert" implemented on the DR550?

- A - Remote Support option uses dial modem to send alerts to IBM.
- B - Storage Manager runs on HMC and uses dial modem to send alerts to IBM.
- C - Remote Support option sends alerts to email addresses supplied by customer.
- D - Storage Manager sends an SNMP alert notification to an SNMP server on the customer network.

Answer: D

Question: 6

How many rack power connections are required in a 28Th “disk only” DRS50 configuration?

- A - Two connections on both racks
- B - Four 220 Volt 30 amp connections
- C - Eight 220 Volt 30 amp connections
- D - Eight 110/220 Volt 20 amp connections

Answer: B

Question: 7

In order for a content management application to access System Storage Archive Manager, which two items must be set up in the System Storage Archive Manager server?

- A - A backup schedule
- B - A client node
- C - A database backup schedule
- D - A management class
- E - A tape storage pool

Answer: B, D

Question: 8

How can content management applications retrieve data from the System Storage Archive Manager?

- A - System Storage Archive Manager API calls
- B - System Storage Archive Manager import/export
- C - System Storage Archive Manager server to server connections
- D - Directly from the System Storage Archive Manager disk storage pools

Answer: A

Question: 9

What is required when planning for the network environment for a dual node DR550?

- A - Six LAN cables
- B - Five TCP/IP addresses
- C - Four Ethernet switches
- D - A network protocol converter

Answer: B

Question: 10

After modifying the state of a volume using the DRM command “move drmedia”, which command would the administrator use to verify the results of the action?

- A - lsvol
- B - query move
- C - query actlog
- D - query tostate

Answer: C

Question: 11

What should be done when defining tape drives and libraries to System Storage Archive Manager?

- A - First make sure AIX can see the devices
- B - Always dedicate a drive for database backup use
- C - First define the tape drives and then the library
- D - Always use the System Storage Archive Manager device drivers only

Answer: A

Question: 12

During the Solution Assurance Review (SAP), a customer expresses plans to attach an unsupported tape library. What is the most appropriate response for the sales team?

- A - Explain to the customer that this unsupported configuration will prevent IBM from completing the order.
- B - Explain that an RPQ is NOT required if the sale of the DR550 was made through a certified Business Partner.
- C - Allow IBM to ship the DR550 with the customer understanding that it is their responsibility to make it work.
- D - Complete the order and ship the DR550 to the customer while waiting for the configuration to be tested and certified.

Answer: A

Question: 13

Which AIX command changes or modifies networking addresses?

- A - smitty chfs
- B - smitty mktcpip
- C - ipconfig/c
- D - ipconfig/m

Answer: B

Question: 14

What must be configured on the content management application machine to communicate with the System Storage Archive Manager server?

- A - Archive client installed, dsmserv.opt configured
- B - TSM backup client installed, dsm.opt or dsm.sys configured
- C - System Storage Archive Manager API installed, dsmserv.opt configured
- D - System Storage Archive Manager API installed, dsm.opt or dsm.sys configured

Answer: D

Question: 15

Which of the following is used to create a backup of rootvg?

- A - smit mkdvd
- B - backup
- C - copydvd
- D - lssavevg
