QUESTION 1:

What is the NetWare console command to verify that automatic workstation import (AWI) is working correctly?

- A. JAVA -SHOW
- B. ZENWSIMPORT
- C. JAVA -ZENWSIMPORT
- D. SHOW -ZENWSIMPORT

Answer: A

From the server console enter JAVA -SHOW. If the server is running, you see the statement com.novell.application.zenworks.autoswmanagement.wsimport

QUESTION 2:

Which statements are true regarding ZENworks for Desktops 4 (ZfD 4) policies? (Choose two)

- A. Policies are stored on the workstation.
- B. Policies are grouped according to functional area.
- C. Policies allow you to assign file system rights to users.
- D. ZfD 4 allows the same type of policy to perform various actions according to a specified schedule.

Answer: B, D

B: For ease of management, the policies (or rules) are grouped into policy packages according to function areas: Container, Server, Service location, and workstation.

D: An example an administrator can schedule an antivirus scan on all workstation at a specific time each day.

QUESTION 3:

By default, which policy package has highest precedence?

- A. A policy package associated with a group object.
- B. A policy package associated with the root object.
- C. A policy package associated with an organization (O) object.
- D. A policy package associated with an organization unit (OU) object.

Answer: A

QUESTION 4:

Rank the default precedence of each policy package in order, from highest to lowest.

Place here

Place highest precedence here

Place middle precedence here

Place lowest precedence here

**Select from these
Policy Packages**

A package associated with a
group object

A package associated with a
container object

A package associated with a
individual object

Answer:

Place here

A package associated with a
individual object

A package associated with a
group object

A package associated with a
container object

**Select from these
Policy Packages**

QUESTION 5:

Which ZENworks for Desktops 4 (ZfD4) policies are cumulative policies? (Choose two)

- A. Windows Group policies
- B. Dynamic Local User polices
- C. Computer Extensible policies
- D. Windows Desktop Preferences polices

Answer: A, C

QUESTION 6:

What is the benefit of implementing a search policy?

- A. It allows you to search eDirectory for a specified user.
- B. It limits how fat up the tree ZENworks looks for effective polices.
- C. It allows outdated workstations to be easily located and removed.
- D. It allows you to monitor events from outside the organization's network.

Answer: B

A search policy prevents tree walking by letting you specify a location in

the tree where workstation manager stop searching for an object's associated policies.

QUESTION 7:

You created a server policy package and associated it with a server object. Where are the policies applied?

- A. To all ZENworks for Desktops back-end servers-
- B. To all objects in the tree that are valid types for the package.
- C. To all objects on the server that are valid types for the package.
- D. To all objects in the container that are valid types for the package.

Answer: C

QUESTION 8:

Which server package policy should you use to automatically place and name workstation objects in the eDirectory tree?

- A. Rollup policy
- B. Wake-on-LAN policy
- C. Imaging server policy
- D. Workstation import policy

Answer: D

QUESTION 9:

Which remote management utility can you use to run applications on the managed workstation from the administrator workstation?

- A. Diagnostics
- B. File Transfer
- C. Remote View
- D. Remote Execute
- E. Remote Wake Up

Answer: D

QUESTION 10:

Click the option in ConsoleOne you use to get real-time information about device drivers on the controlled workstation.
