QUESTION: 1

Sofie intends to deploy a component to users who speak two languages, so would like to support each in their native language. How can she best accomplish this?

- A. Use an IBM WebSphere Translation Server as a front-end to the component
- B. Create external files for text localization for each language using component options
- C. Write separate pages for each language, computing the correct starting page based on a cookie
- D. Write two components, one in each language, and ask users to select the language they desire on a single page in Portal

Answer: B

QUESTION: 2

Jason has developed a component and discovered that in rare circumstances, a user can cause an error to occur in the application. While he works on correcting the problem, he would like to make sure that a friendly error message is displayed when this happens. How can he accomplish this?

- A. Create the page, then set the Error page in Component Options
- B. Create an external page, then reference the URL in Component Options
- C. Create an external page, then reference the URL in the Preferences dialog
- D. Create the page, then set the default error page in the Preferences dialog

Answer: A

QUESTION: 3

As Will is developing a component with sensitive data, he needs to set access control on the database. Where can he perform this task?

- A. Page Properties
- B. Component Options
- C. Preference dialog
- D. Deployment Profile

Answer: B

QUESTION: 4

As Jeremy prepares to deploy his component as part of a composite application, he

discovers that only a single portlet is displayed in WebSphere Portal. He had created many pages in the component with the intent of deploying more portlets. What is the problem?

- A. The administrator does not have rights to the other pages in the component
- B. The deployment profile needs to be modified to generate portlets for pages
- C. The default portlet was created automatically, he needs to define other portlets in component options
- D. Each page that is the default view for a portlet needs the portlet definition options set in the Properties panel

Answer: C

QUESTION: 5

What is a difference between the Editor and Author Roles in Lotus Component Designer?

- A. Editors can create new documents, Authors cannot.
- B. There is no difference between the two in Lotus Component Designer.
- C. Authors can create, edit, and delete documents, Editors may only edit them.
- D. Authors can only read other peoples' documents and create and edit their own; Editors can read, create, and edit any document.

Answer: D

QUESTION: 6

Jill's WebSphere Portal administrator has informed her that it is the administrator's job to use the WebSphere Portal Portlet Wiring Tool to wire portlets. However in order to transfer instances of these properties and their values to and from portlets to initiate actions, Jill must work with which design element in Lotus Component Designer?

- A. Roles
- B. Wiring properties
- C. Action properties
- D. Script properties

Answer: B

QUESTION: 7

Iona is readying her composite application for deployment. In addition to defining portlets and setting parameters on source and target portlets, what other activity is required in order for the portlets in her application to cooperate?

- A. Wiring the portlets
- B. Setting property broker actions
- C. Writing a composite application script
- D. Modifying the deployment profile for multiple portlets

Answer: B

QUESTION: 8

Once Xavier has completed his composite application and deployed it to the WebSphere Portal server, he discovers that it would be better to have some configurable parameters for the Portal administrator to manage, like the header text for the portlet(s). How would he accomplish this development task?

- A. Modify the deployment profile to add administration parameters
- B. Add composite application parameters from the menu or Designer Navigator
- C. Modify the role for composite applications to the exact text "Administrator"
- D. Modify the Deployment Descriptor Language (DDL) file prior to delivering the application

Answer: B

QUESTION: 9

Heather is going to create item a template for her WebSphere Portal environment. However when she logs into the server she does not see the Template's button from the window top menu. What is the most likely reason?

- A. The environment does not support templates.
- B. She needs to Authenticate as an administrator.
- C. The environment already has a template deployed.
- D. She does not have access to create Templates for her environment.

Answer: D

QUESTION: 10

Paul is deploying a composite application and would like to define a script that is run
