Refer to the exhibit. You are using Cisco Telepresence Manager and have just added a new room in the Cisco Unified Communications Manager and have made test calls successfully. You run the Discover Rooms option under Discovery Service successfully. You then go into the Rooms section and see the status. Which is the cause of the problem?

- The Cisco Telepresence room Fluffy does not have an email account listed in the Unified CM. This is preventing the Cisco Telepresence Manager from synchronizing with the email address for the Cisco Telepresence Room in the Calendar server.
- The Cisco Telepresence room Fluffy has an email address listed in the Unified CM. The Calendar server does not have an account for the email address provided by the Unified CM.
- The Cisco Telepresence room Fluffy has an email address listed in the Unified CM. The Calendar server has an account for the email address provided by the Unified CM. The Cisco Telepresence Manager does not have proper privileges to view this account.
- The Cisco Telepresence room Fluffy has an email address listed in the Unified CM. The Calendar server has an account for the email address provided by the Unified CM. The Cisco Telepresence Manager cannot authenticate to the LDAP server and cannot log into the Calendar server to synchronize with the account.

Answer: C

Question: 5

During the RRA, how should you hold the light sensor when taking the majority of light measurements?

- Horizontally, so it gets the direct lighting from ceiling light fixtures.
- Vertically, toward the displays to measure the light they put off.
- Horizontally, toward any untreated windows to measure light coming in.
- Vertically, so it is reading light as if it were hitting the participant's face.

Answer: D

Question: 6
