PRO- Designing and Deploying Messaging Solutions with Microsoft Exchange Server 2010

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=70-663>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 70-663 exam in first attempt, but also you can get a high score to acquire Microsoft certification.

If you use pass4sureofficial 70-663 Certification questions and answers, you will experience actual 70-663 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Microsoft exam prep covers over 95% of the questions and answers that may be appeared in your 70-663 exam. Every point from pass4sure 70-663 PDF, 70-663 review will help you take Microsoft 70-663 exam much easier and become Microsoft certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial Microsoft 70-663 course:

- * Up-to-Date Microsoft 70-663 questions taken from the real exam.
- * 100% correct Microsoft 70-663 answers you simply can't find in other 70-663 courses.
- * All of our tests are easy to download. Your file will be saved as a 70-663 PDF.
- * Microsoft 70-663 brain dump free content featuring the real 70-663 test questions.

Microsoft 70-663 certification exam is of core importance both in your Professional life and Microsoft certification path. With Microsoft certification you can get a good job easily in the market and get on your path for success. Professionals who passed Microsoft 70-663 exam training are an absolute favorite in the industry. You will pass Microsoft 70-663 certification test and career opportunities will be open for you.

QUESTION: 1

Your network contains an Active Directory forest that has a single domain. You have an Exchange Server 2010 organization. You plan to add a new domain to this Active Directory forest and deploy Exchange Server 2010 servers in the new domain. A user named Admin1 is a member of this Active Directory group named Organization Management. Admin1 will deploy the Exchange new domain. You need to identify the minimum permissions required to allow Admin1 to install Exchange Server 2010 servers in the new domain. Which group should you add Admin1 to?

- A. Domain Admins
- B. Enterprise Admins
- C. Exchange Install Domain Servers
- D. Server Operators

Answer: C

QUESTION: 2

Your company has a Exchange Server 2010 organization. You plan to deploy Microsoft Office Outlook and mobile devices for remote users. You need to plan the deployment of Client Access servers to support the automatic configuration of Outlook profiles and -----
--. What should you include in the plan?

- A. Autodiscover
- B. MailTips
- C. Remote Access Server
- D. Unified Messaging auto attendant

Answer: A

QUESTION: 3

Your network contains an internal network and a perimeter network that are separated by firewall. The perimeter network ----- Server 2010 Edge Transport server. You plan to deploy an internal Exchange Server 2010 organization that meets the following requirements.

- Support EdgeSync synchronization
- Support encrypted delivery of outbound e-mail messages to the Edge Transport server
- Minimize the attack surface of the internal network

Which TCP ports should you allow form the internal network to the perimeter network?

- A. 3309 and 25

- B. 3309 and 636
- C. 50636 and 25
- D. 50636 and 135

Answer: C

QUESTION: 4

Your network consists of a single Active Directory suite. You plan to deploy Exchange Server 2010. You need to plan the deployment of Exchange Server 2010 servers to meet the following requirements:

- All Mailbox servers must belong to a database availability group (DAG)
- MAPI connections from Outlook clients must be load balanced by using a hardware load balancer
- If a single server fails, users must continue to send and receive e-mail
- The plan must minimize the number of server deployed

What should you include in the plan?

- A. Deploy two servers. On the two servers, deploy the Mailbox server role, the Client Access server role, and the Hub Transport server role. Configure a Client Access server array.
- B. Deploy two servers. On the two servers, deploy the Mailbox server role, the Client Access server role, and the Hub Transport server role. Enable Outlook Anywhere on both Client Access servers.
- C. Deploy four servers. On two of the servers, deploy the Mailbox server role and the Hub Transport server role. On the other two servers deploy the Client Access server role. Configure a Client Access server array.
- D. Deploy four servers. On two of the servers, deploy the Mailbox server role. On the other two servers, deploy the Client Access server role, and the Hub Transport server role. Enable Outlook Anywhere on both Client Access servers.

Answer: A

QUESTION: 5

You have an Exchange Server 2010 organization that contains multiple Hub Transport servers. You need to recommend a message hygiene solution to meet the following requirements:

- Block servers that are known to send spam
- Minimize administrative effort

What should you recommend?

- A. an IP Block list

- B. IP Block list providers
- C. recipient filtering
- D. sender filtering

Answer: B

QUESTION: 6

Your network contains two Exchange Server 2010 Edge Transport server and five Exchange Server 2010 Hub Transport servers. All e-mail sent from your organization to the Internet is transferred by the Edge Transport servers. You need to recommend a security solution for the organization to meet the following requirements:

- Ensure that users can send encrypted messages to any other organization on the Internet
- Ensure that all Exchange related communication between Hub Transport servers and Edge Transport servers is encrypted. What should you recommend?

- A. Deploy IPsec.
- B. Deploy SMTP over SSL.
- C. Implement Domain Security.
- D. Implement Security/Multipurpose Internet Mail Extensions (S/MIME)

Answer: D

QUESTION: 7

Your company has two data centers. Each data center contains a perimeter network. Your network contains an Exchange Server 2010 organization. You plan to deploy Exchange Server 2010 Edge Transport servers in the perimeter networks. You need to recommend a solution for the Edge Transport servers that meets the following requirements:

- Distributes inbound email messages across all Edge Transport servers
- Ensures that users receive inbound e-mail messages if an Edge Transport server fails
- Ensures that users receive inbound e-mail messages if a single data center network becomes unavailable
- Minimize costs

What should you recommend?

- A. In each perimeter network, deploy one Edge Transport server. Implement failover clustering.
- B. In each perimeter network, deploy two Edge Transport servers. Implement failover clustering.
- C. In each perimeter network, deploy one Edge Transport server. Configure a mail exchange (MX) record for each server.

D. In each perimeter network, deploy two Edge Transport servers. Configure a mail exchange (MX) record for each server.

Answer: C

QUESTION: 8

Your company has an Exchange 2010 organization that contains multiple Hub Transport servers. You have a line of business application that retry e-mail messages by using a Hub Transport server named Hub1. The application only supports sending e-mail to a single SMTP server. You need to ensure that the application can retry e-mail messages of Hub1 tabs. What should you do?

- A. Implement log transactions
- B. Install and configure failover clustering on the Hub Transport servers.
- C. Implement Windows network load balancing on the Hub Transport servers.
- D. Create multiple MX records for the Hub Transport servers in the internal DNS zone.

Answer: C

QUESTION: 9

Your company has a main office and a branch office. An Active Directory site exists for each office. The offices are connected by a WAN link. You plan to deploy Exchange Server 2010 in each site. You need to identify the number of Exchange servers required to meet the following requirements:

- Maintain user access to mailboxes if a single server fails
- Use the minimize account of Exchange servers in each site

How many servers should you deploy in each site?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: B

QUESTION: 10

You have an Exchange Server 2010 organization. The organization has a Hub Transport server that has anti-spam agents installed. You plan to delegate the administration of the organization to a group named Security Administrators. You need to ensure that members

Pass4SureOfficial.com Lifetime Membership Features;
