- A. High Availability Cluster Microprocessing (HACMP)
- B. Standby Recovery Server
- C. Serviceguard for HP-UX
- D. Microsoft Cluster Server (MSCS)
- E. Serviceguard for OpenVMS

Answer: C,D

Question: 3

It is brought to your attention that Company.com recently experienced a break-in to their systems.

What options would you suggest to the client to minimize break-in vulnerability? Select TWO.

- A. Disable remote dial-in.
- B. Update all required patches, drivers and software versions.
- C. Disable the administrator account.
- D. Implement system policies to enforce strong passwords.
- E. Keep the ADMIN account password locked in a safe.

Answer: A,D

Question: 4

When upgrading an Integrity server from a single-core CPU to a dual-core CPU, what are the benefits for Company.com? Select TWO.

- A. greater system performance
- B. improved I/O access latency
- C. improved memory access latency
- D. doubling of the maximum number of processors in the system
- E. the same performance, but with a second processor

Answer: A,D

Question: 5

Company.com is in need of an entry-level Integrity server that only supports HP-UX 11.i v2 or Linux with a maximum of two CPUs.

Which server meets this minimum requirement and is the most cost-effective?

- A. rx1600

- B. rx1620
- C. rx2620
- D. rx4640

Answer: A

Question: 6

What is the best way to be notified of the latest drivers, patches and security alerts for the rx4640 server?

- A. Subscribe to HP's online driver and support alerts for the rx4640 server.
- B. Subscribe to HP's change control website for the rx4640 server.
- C. Install HP's rx4640 Product Bulletin onto a server.
- D. Install HP's Quick Find utility for the rx4640 server.

Answer: A

Question: 7

Company.com is experiencing issues with the electrical power in their Integrity server host building. The power will fluctuate for brief periods of time, which causes the existing servers to reboot without warning.

Which solution should you recommend to Company.com that would require the least amount of effort?

- A. Install a UPS sized to the capacity needed.
- B. Shift to another building that has better power.
- C. Get a step-up transformer to increase the voltage.
- D. Hire a local electrical company to change or add another direct power line of a better quality.

Answer: A

Question: 8

You have won a support contract with an insurance company. It is brought to your attention that they have recently experienced a break-in to their systems.

What may have contributed to this vulnerability?

- A. The company allows its executives to remotely dial-up using a Virtual Private Network (VPN).
- B. The company failed to implement file encryption on their servers.
- C. The company password change policy forces a new password every 365 days.
- D. All authorized IT staff have access to the server room.

Answer: C

Question: 9

What is the minimum system that supports hardware partitions?

- A. Superdome
- B. rx2620
- C. rx4640
- D. rx7620

Answer: D

Question: 10

Company.com wants to simultaneously operate an HP-UX SAP application and a Red Hat Linux Oracle application on a single server.

Which HP server provides this capability?

- A. rx16xx
- B. rx26xx
- C. rx46xx
- D. rx76xx

Answer: D

Question: 11

Company.com has concerns about his ability to manage his server remotely. As part of your proposed plan and design, you recommend an HP Integrity server because of its integrated management.

What is the name of this management feature?

- A. HP OpenView Operations
- B. HP OpenView Network Node Manager
- C. HP RILOE II
- D. HP Integrated Lights-out (iLO)

Answer: D
