Power Builder 6.0 Developer Associate

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=510-301>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 510-301 exam in first attempt, but also you can get a high score to acquire Sybase certification.

If you use pass4sureofficial 510-301 Certification questions and answers, you will experience actual 510-301 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Sybase exam prep covers over 95% of the questions and answers that may be appeared in your 510-301 exam. Every point from pass4sure 510-301 PDF, 510-301 review will help you take Sybase 510-301 exam much easier and become Sybase certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial Sybase 510-301 course:

- * Up-to-Date Sybase 510-301 questions taken from the real exam.
- * 100% correct Sybase 510-301 answers you simply can't find in other 510-301 courses.
- * All of our tests are easy to download. Your file will be saved as a 510-301 PDF.
- * Sybase 510-301 brain dump free content featuring the real 510-301 test questions.

Sybase 510-301 certification exam is of core importance both in your Professional life and Sybase certification path. With Sybase certification you can get a good job easily in the market and get on your path for success. Professionals who passed Sybase 510-301 exam training are an absolute favorite in the industry. You will pass Sybase 510-301 certification test and career opportunities will be open for you.

Question: 1

Tab Pages in a Tab Control have a number of properties, including text, enabled, visible and picture. Which two statements about Tab Page properties are true when custom visual user objects are used as Tab Pages? (Choose two.)

- A. The Tab Page properties can only be set for the page when it is added to the control.
- B. The custom visual user-object painter allows Tab Page properties to be specified prior to its use in a Tab Control.
- C. Tab Page properties may be defined for a custom visual user-object and can be overridden in the Tab Control painter.
- D. Tab page properties must be set programmatically when a custom visual user-object is used as a Tab Page because the Tab Control properties dialogue does not allow them to be changed.

Answer: B, C

Question: 2

Which two functions would be used to dynamically include a ListViewItem in a ListView Control where the ListViewItem has a value set in its data property? (Choose two.)

- A. AddItem (ListViewItem n)
- B. AddItem (integer i, string l)
- C. InsertItem (integer l, ListViewItem n)
- D. InsertItem (integer l, ListViewItem n, integer p)

Answer: A, C

Question: 3

A large insurance application has a customer policy window, which contains a Tab control that includes 12 separate tab pages containing information related to the customer, but not unrelated to information in other pages. The window takes an unacceptably long time to load but the user insists that the Tab control is the preferred approach. Which Tab control technique would be best suited to improving the window instantiation time to an acceptable level?

- A. Dynamically create tab pages using OpenTab ()
- B. Set the Tab Control "create on demand" property to true
- C. Dynamically create the Tab control using OpenUserObject (), posting the function so that the control is created after the window has painted
- D. Use the CreatePage () function to create pages as the user clicks on the individual Tab Pages

Answer: B

Question: 4

Which function would be used to force a Tab Page (that has not been selected) to be created when the "Create on Demand" feature of the Tab Control has been enabled?

- A. OpenTab ()
- B. OpenUserObject ()
- C. Open ()
- D. CreatePage ()
- E. CREATE

Answer: D

Question: 5

Which three features are supported by the Tab Control? (Choose three.)

- A. Multiple lines of tab pages
- B. Creation of tab pages dynamically on-demand
- C. Pictures displayed with the tab page text
- D. Alphabetical sorting of tab pages

Answer: A, B, C

Question: 6

An MDI application has a sheet window that includes a DataWindow to allow customer details to be added, changed, and deleted. There is a requirement for the support of popup menus to allow the manipulation of the DataWindow. The code below is developed to meet this requirement.

```
m_genapp_sheet Im_popup  
Im_popup = CREATE m_genapp_sheet  
Im_popup.m_edit.PopupMenu ( parent.PointerX(), parent.PointerY() )
```

If the code were placed in the rbuttondown event of the DataWindow, what would happen?

- A. The popup menu will appear at the coordinates of the mouse pointer.
- B. The popup menu will appear but will not be at the coordinates of the mouse pointer.
- C. The popup menu will not appear.
- D. A runtime error will occur.

Answer: B

Question: 7

Given the following declaration and assuming the following script was located in the 'Open' event of a window:

```
menu Im_winmenu
```

Which statement will return a reference pointer to the menu associated with the window?

- A. Im_winmenu = parent.menuid
- B. Im_winmenu = this.menuid
- C. Im_winmenu = this.menu
- D. Im_winmenu = this.menu.object.ClassName()
- E. Im_winmenu = this.contromenu

Answer: B

Question: 8

Which two statements about the production of PBDs are true? (Choose two.)

- A. PBDs can not be created for Windows 3.x.
- B. PBDs can be created for both 16 and 32 bit operating systems.
- C. PBDs can be optimized for speed or space when they are built.
- D. PBDs can be rebuilt incrementally or in full.

Answer: B, D

Question: 9

Which three statements about the PBR file are true? (Choose three.)

- A. The PBR file is configured in a painter.
- B. A PBR is a text file created using any editor.
- C. A PBR file often contains file names and paths for bitmaps and icons.
- D. A PBR file may contains references to DataWindow objects that are dynamically assigned in the application.
- E. A PBR file may contains references to Custom Class objects that are dynamically created using the CREATE USING syntax in the application.

Answer: B, C, D

Question: 10

Which two statements about the use of a PBR to include resources in an executable are true? (Choose two.)

- A. The size of the exe will not get larger when using a PBR file.
- B. The number of files that have to be distributed will be lower.
- C. Inclusion of large resource files that will be rarely used in the application will use memory if it is included in the resource file.
- D. If a PBR is used all resource files must be included preventing individual resource files from being deployed separately.

Answer: B, C

Question: 11

A window has two DataWindows that form a logical unit of work. If either of the DataWindows fails to update then no changes should be committed to the database.

The code below is executed by the user to carry out the save, but testing has reported some problems.

```
IF dw_1.Update ( ) = 1 THEN
IF dw_2.Update ( ) = 1 THEN
COMMIT ;
ELSE
ROLLBACK ;
END IF
END IF
ROLLBACK ;
```

Which statement best describes the problems that the code will exhibit?

- A. ROLLBACK can be issued twice which will cause a database error, halting the application.
- B. If the dw_2 update fails and the user corrects the data that was causing the failure, and saves again, changes originally made to dw_1 will be lost.
- C. All changes will be rolled back regardless of the success of the update so no changes will be made on the database.
- D. The code is acceptable so the problem must be on the database.

Answer: B

Question: 12

The following code in the Clicked event of a DataWindow control highlights rows:

```
this.SelectRow ( 0, True )
```

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
