

# 70-511-CSharp

## Microsoft

### *Windows Apps Dev Microsoft .NET Framework 4*

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=70-511-CSharp>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 70-511-CSharp exam in first attempt, but also you can get a high score to acquire Microsoft certification.

If you use pass4sureofficial 70-511-CSharp Certification questions and answers, you will experience actual 70-511-CSharp exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Microsoft exam prep covers over 95% of the questions and answers that may be appeared in your 70-511-CSharp exam. Every point from pass4sure 70-511-CSharp PDF, 70-511-CSharp review will help you take Microsoft 70-511-CSharp exam much easier and become Microsoft certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial Microsoft 70-511-CSharp course:

- \* Up-to-Date Microsoft 70-511-CSharp questions taken from the real exam.
- \* 100% correct Microsoft 70-511-CSharp answers you simply can't find in other 70-511-CSharp courses.
- \* All of our tests are easy to download. Your file will be saved as a 70-511-CSharp PDF.
- \* Microsoft 70-511-CSharp brain dump free content featuring the real 70-511-CSharp test questions.

Microsoft 70-511-CSharp certification exam is of core importance both in your Professional life and Microsoft certification path. With Microsoft certification you can get a good job easily in the market and get on your path for success. Professionals who passed Microsoft 70-511-CSharp exam training are an absolute favorite in the industry. You will pass Microsoft 70-511-CSharp certification test and career opportunities will be open for you.

**QUESTION: 1**

You use Microsoft .NET Framework 4 to create a Windows Forms application. You add a new class named Customer to the application. You select the Customer class to create a new object data source. You add the following components to a Windows Form:

- A BindingSource component named customerBindingSource that is data-bound to the Customer object data source.
- A set of TextBox controls to display and edit the Customer object properties. Each TextBox control is data-bound to a property of the customerBindingSource component.
- An ErrorProvider component named errorProvider that validates the input values for each TextBox control.

You need to ensure that the input data for each TextBox control is automatically validated by using the ErrorProvider component.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Implement the validation rules inside the Validating event handler of each TextBox control by throwing an exception when the value is invalid.
- B. Implement the validation rules inside the TextChanged event handler of each TextBox control by throwing an exception when the value is invalid.
- C. Implement the validation rules inside the setter of each property of the Customer class by throwing an exception when the value is invalid.
- D. Add the following code segment to the InitializeComponent method of the Windows Form. `this.errorProvider.DataSource = this.customerBindingSource;`
- E. Add the following code segment to the InitializeComponent method of the Windows Form. `this.errorProvider.DataSource = this.customerBindingSource.DataSource;`  
`this.errorProvider.DataMember = this.customerBindingSource.DataMember;`

**Answer:** C, D

**QUESTION: 2**

You use Microsoft Visual Studio 2010 and Microsoft .NET Framework 4 to create a Windows Presentation Foundation (WPF) application. The application contains a ListBox control named IbxItems that is data-bound to a collection of objects. Each object has a DisplayValue property. You add a Button control to the application. You need to ensure that the Content property of the Button control is data-bound to the DisplayValue property of the selected item of IbxItems. Which binding expression should you use?

- A. `{ Binding ElementName= IbxItems, Source=SelectedItem, Path=DisplayValue }`
- B. `{ Binding Source=IbxItems, ElementName=SelectedItem, Path=DisplayValue }`
- C. `{ Binding ElementName=IbxItems, Path=SelectedItem.DisplayValue }`
- D. `{ Binding Source=IbxItems, Path=SelectedItem.DisplayValue }`

**Answer:** C

**QUESTION: 3**

You use Microsoft Visual Studio 2010 and Microsoft .NET Framework 4 to create a Windows Presentation Foundation (WPF) application. You write the following code fragment.

```
< TextBox Text="{Binding Path=StringMember} " / >
```

You need to ensure that the StringMember property of the data-bound object is updated immediately when the user types in the TextBox control. Which binding expression should you use?

- A. { Binding Path=StringMember, Mode=TwoWay }
- B. { Binding Path=StringMember, NotifyOnSourceUpdated=True }
- C. { Binding Path=StringMember, NotifyOnTargetUpdated=True }
- D. { Binding Path=StringMember, UpdateSourceTrigger=PropertyChanged }

**Answer: D**

**QUESTION: 4**

You use Microsoft .NET Framework 4 to create a Windows Presentation Foundation (WPF) application. You add a ListBox control to the application. The ListBox control is data-bound to an instance of a custom collection class of the Product objects named ProductList. The number of items of the data-bound collection is fixed. However, users can modify the properties of each of the Product objects in the collection. You need to ensure that changes made on the Product objects are automatically reflected in the ListBox control. What should you do?

- A. Implement the INotifyPropertyChanged interface in the Product class.
- B. Implement the INotifyCollectionChanged interface in the ProductList class.
- C. Set the Mode property of the Binding object of the ListBox control to TwoWay.
- D. Set the UpdateSourceTrigger property of the Binding object of the ListBox control to PropertyChanged.

**Answer: A**

**QUESTION: 5**

You use Microsoft .NET Framework 4 to create a Windows Presentation Foundation (WPF) application. You plan to allow users to customize the background colors, foreground colors, and font style of the application. You also plan to add a TextBlock control to the application. You write the following code fragment. (Line numbers are included for reference only.)

```

01 < Window.Resources >
02   < src:ocColorSchemes x:Key="colorschemes" / >
03   < src:ocFonts x:Key="fonts" / >
04   ...
05   < DataTemplate x:Key="StringTemplate" > < TextBlock
06     Text="(Binding Path=.)" / > < /DataTemplate >
07   ...
08   < HierarchicalDataTemplate x:Key="ColorSchemeTemplate"
09     ItemsSource="(Binding Path=ocColors)"
10     ItemTemplate="{StaticResource
11       StringTemplate}" > < TextBlock Text="(Binding
12       Path=.)" / >
13   < /HierarchicalDataTemplate >
14   < /Window.Resources >
15

```

You need to ensure that the ContextMenu control is associated with the TextBlock control. You also need to ensure that the properties that can be customized are shown hierarchically. Which code fragment should you insert at line 15?

A. < Grid >

< Menu >

<MenuItem Header="Color Scheme" DataContext="{StaticResource colorschemes}" ItemsSource="{Binding Path=." ItemTemplate="{StaticResource StringTemplate}" />

<MenuItem Header="Font" DataContext="{StaticResource fonts}" ItemsSource="{Binding Path=." ItemTemplate="{StaticResource StringTemplate}" />

< /Menu >

< TextBlock Width="200" Height="100" Background="LightBlue" /> < /Grid >

B. < Window.ContextMenu >

< ContextMenu >

< MenuItem Header="Color Scheme" DataContext="{StaticResource colorschemes}" ItemsSource="{Binding Path=." ItemTemplate="{StaticResource StringTemplate}" />

< MenuItem Header="Font" DataContext="{StaticResource fonts}" ItemsSource="{Binding Path=." ItemTemplate="{StaticResource StringTemplate}" />

< /ContextMenu >

< /Window.ContextMenu >

C. < Grid >

< TextBlock Width="200" Height="100" Background="LightBlue" /> < /Grid >

< Window.ContextMenu >

< ContextMenu >

< TextBlock Width="200" Height="100" Background="LightBlue" />

<MenuItem Header="Color Scheme" DataContext="{StaticResource colorschemes}" ItemsSource="{Binding Path=.\*}" ItemTemplate="{StaticResource ColorSchemeTemplate}" />

<MenuItem Header="Font" DataContext="{StaticResource fonts}" ItemsSource="{Binding Path=." ItemTemplate="{StaticResource StringTemplate}" />

< /MenuItem >

< /MenuItem >

```

</ContextMenu >
</Window.ContextMenu >
D. < Grid >
< TextBlock Uidth="200" Height="100" Background="LightBlue" >
< TextBlock.ContextMenu>
< ContextMenu>
<MenuItem Header="Color Scheme" DataContext="{StaticResource colorschemes}"
ItemsSource="{Binding Path=.) ItemTemplate="{StaticResource
ColorSchemeTemplate}" / >
<MenuItem Header="Font" DataContext="{StaticResource fonts}"
ItemsSource="{Binding Path=.) ItemTemplate="{StaticResource StringTemplate}" > <
/MenuItem >
</ContextMenu>
</TextBlock.ContextMenu >
</TextBlock > </Grid >

```

**Answer:** D

### QUESTION: 6

You use Microsoft .NET Framework 4 to create a Windows Presentation Foundation (WPF) application. You write the following code fragment.

```

<Window x:Class="MyProject.MainWindow" xmlns:local="clr-namespace:MyProject">
  <Window.Resources>
    <local:MyConverter x:Key="myConverter" />
  </Window.Resources>
  <ListBox Name="box">
    <ListBox.ItemTemplate>
      <DataTemplate>
        <TextBlock
          Text="{Binding Converter={StaticResource myConverter}, ConverterParameter=formatText}"
          Background="{Binding Converter={StaticResource myConverter}, ConverterParameter=formatColor}"
          IsEnabled="{Binding Converter={StaticResource myConverter}}" />
      </DataTemplate>
    </ListBox.ItemTemplate>
  </ListBox>
</Window>

```

You need to implement the MyProject.MyConverter class. What should you do?

- A. Implement the IValueConverter interface.
- B. Implement the IMultiValueConverter interface.
- C. Inherit from the TypeConverter class.
- D. Apply the TypeConverterAttribute attribute.

**Answer:** A

### QUESTION: 7

You use Microsoft .NET Framework 4 to create a Windows Presentation Foundation (WPF) application. The application contains an ObservableCollection object named

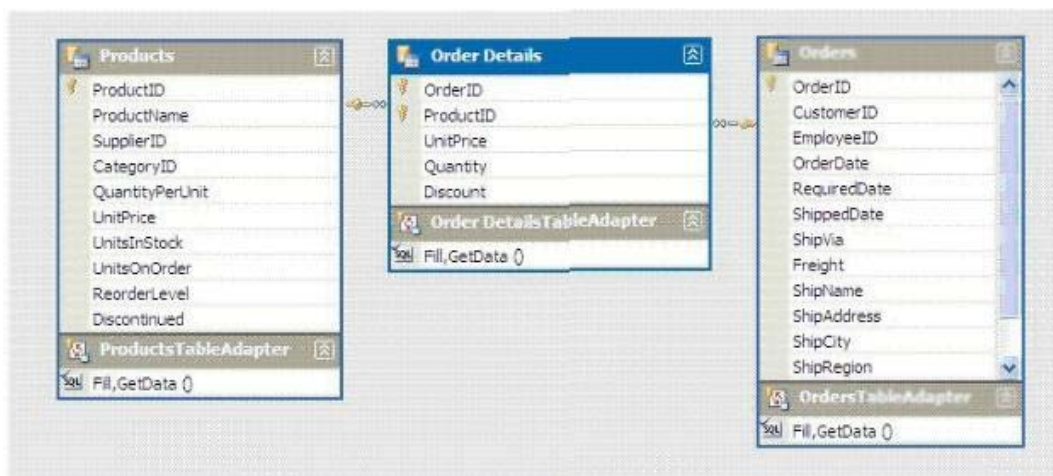

Pictures that contains several Picture objects. Each Picture object contains the Name and PictureFilePath properties. You add a ListBox control to the application You need to ensure that the pictures are displayed in the ListBox control. Which code fragment should you use?

- A. `<ListBox ItemsSource="{Binding Source={StaticResource pictures}}">  
 <ListBox.ItemTemplate <DataTemplate>  
 <TextBlockXTextBlock.Text>  
 <Binding Path="PictureFilePath" /> </TextBlock.TextX/TextBlock> </DataTemplate>  
 </ListBox.ItemTemplate> </LiscBox>`
- B. `<ListBox ItemsSource="{Binding Source={StaticResource pictures}}">  
 <ListBox.ItemTemplate <DataTemplate>  
 <Image Source="{Binding Source={StaticResource pictures}/ Path=PictureFilePath}"/>  
 </DataTemplate> </ListBox.ItemTemplate> </ListBox>`
- C. `<ListBox ItemsSource="(Binding Source-{StaticResource pictures})">  
 <ListBox.ItemTemplate <DataTemplate>  
 <TextBlockXTextBlock.Text>  
 <Binding Path="Name" /> </TextBlock.Text></TextBlock> </DataTemplate>  
 </ListBox.ItemTemplate </LiscBox>`
- D. `<ListBox ItemsSource="(Binding Source{StaticResource pictures})">  
 <ListBox.ItemTemplate <DataTemplate>  
 <Image Source="{Binding Path=PictureFilePath}"/> </DataTemplate>  
 </ListBox.ItemTemplate>  
 </ListBox>`

**Answer:** D

**QUESTION:** 8

You use Microsoft .NET Framework 4 to create a Windows Forms application. You have a dataset as shown in the following exhibit.

## Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
